Agri-Food Laboratories

---

This is a new tool from Agri-Food Laboratories, which allows you to re-evaluate the nutrient value of your manure using current fertilizer pricing. Utilizing the Agri-Food Laboratories Reports On-Line system, you can access your current manure analysis and adjust the 'Value of Manure' section of the report to reflect the current fertilizer costs for your particular market area.

The Utility is easy to use;

1. Select a manure report
2. Choose the Manure Evaluator Link
3. Choose your desired Nitrogen, Phosphorus and Potassium products for which the price is known (per tonne)
4. Enter the Price per tonne of each product
5. Select Calculate
6. Review the price per pound of actual nutrient
7. Select Generate PDF
8. Open the modified PDF and print a copy for your records. The Value of Manure section will have changed to meet the values you entered.

There are resources at [www.agtest.com](http://www.agtest.com) that reference manure sampling procedures as well as interpreting your AgTest Manure Report.

If you have any problems using the manure evaluator, please contact us.

If you need access to Reports On-Line, please contact the lab  
at 1-800-265-7175 or [lab@agtest.com](mailto:lab@agtest.com)
